

Vee Technologies: A 2017 IAOP Global Outsourcing 100 Provider

Vee Technologies named in 2017 IAOP Global Outsourcing 100 list among world's top outsourcing service providers!

NEW YORK, NY, USA, June 30, 2017 /EINPresswire.com/ -- New York, NY – June 27, 2017: Vee Technologies, a strategic business processes, services, and solutions provider for multiple industry verticals has been listed in the 2017 Global Outsourcing 100 list released by the International Association of Outsourcing Professionals (IAOP). This is an annual list that recognizes the best outsourcing service providers in the world. This is the second consecutive year that it has been recognized in the list.

Headquartered in New York, U.S., and Bangalore, India, Vee Technologies has proven its excellence through innovative processes, commitment to accuracy and quality, and corporate social responsibility. The IAOP list has also recognized Vee Technologies as a Rising Star in the 2017 group list. Since it was launched in 2000, this is an achievement that is a testament to the company's rapid and consistent growth. The IAOP Global Outsourcing 100 list has also recognized Vee Technologies with 'stars' for distinguishing itself in three key judging categories – Customer References, Awards & Certifications, and Corporate Social Responsibility.

"More and more, outsourcing is not done to reduce costs," said Debi Hamill, IAOP CEO. "Today innovation is what customers are looking for and what providers need to address."

Vee Technologies' extraordinary results with clients across industries, ranging from healthcare to engineering, have led to revenues growing by 65% in 2016 alone. The year 2016 was also a turning point for the company with the launch of a 10,000 seater IT center for its employees that ensures increased scalability, cost effectiveness, and value for its clients.

Chocko Valliappa, CEO, Vee Technologies, says that, "2016 was a transformational year for us – each of our operational locations has a second center today with a 10,000 seat facility under construction in Salem. We focused on population health, analytics, process re-engineering, and innovation and were able to deliver our brand promise of Extraordinary Outcomes".

“The more complex and the more difficult the task, the more people choose us,” stated Patrick L. O’Malley, President, Vee Technologies.

The IAOP list premiered in a special section on outsourcing in the 2nd Quarter 2017 issue of Fortune magazine, which released in June 2017.

The judging panel of the 2017 Global Outsourcing 100 list, consisting of renowned outsourcing experts, led by Michael Corbett, Chairman, and Debi Hamill, CEO of IAOP, selected Vee Technologies based on its performance and growth measured against a set of measurable standards.
